

This is regards NAB's petition 04-160. I am an over the road truck driver & the satellite radio is the best thing that has happened in our industry in a long time. I rely on the traffic & weather broadcasts in the cities I pickup & deliver. I can check the traffic & weather before I go in to the city. This makes my trip much safer & easier.

Also sattelite provides me news, weather & entertainment all over the country.

Please do not let the NAB stop our use of sattelite radio.
